COMIDOR V5.6

Product Release Notes

31/08/2018

Comidor v5.6 – Available by September 5th, 2018

1. General

We are happy to announce the release of **Comidor v5.6**, and its improvements and general overlay changes that we've delivered towards **User Experience** maximization, focusing on ergonomics, aesthetics, functionality and easiness of use.

You will notice the following main improvements while logging to the system:

- ✓ Our fresh new **Logo**, appearing at the top left corner of the platform.
- ✓ New colour scheme for **Main menu** and **Notifications**.

- ✓ **Chatting** can be switched on/off form the top right corner bubble icon (green means "on").
- ✓ **Comments** are now foldable, so that you can hide/show in all tables.
- ✓ You have available a rich Editor for **Comments**, so that you can edit fields smartly,

Especially on the Main menu (Modules) which unfolds pressing the ⬤ button, you'll notice that:

- ✓ **Business Management** tab includes **Financial** tab, as we pay attention to menu simplification and consolidation.
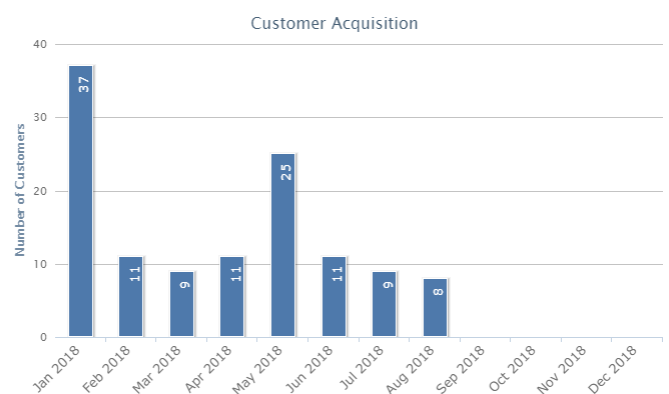

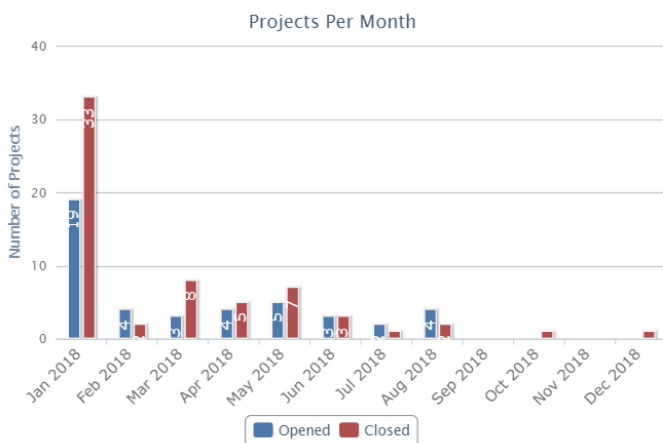

✓ Take advantage of the powerful **Reports & Analytics** tab, accessing information related to specific categories, as shown below:

✓ Focusing at the **Dashboard** from **Reports & Analytics** tab, users can get personalized information for given time periods, selecting among the following:

Name	Capacity	Total Scheduled	Not Productive	Invoiced hours	Chargeable	Not Chargeable	Not Approved	Overtime	Utilization	People Effectiveness	Productivity	Efficiency
George Fylak...	136.00	167.12	-6.00	0.00	13.00	129.00	0.0	7.50	9.56%	0.00	6.12	196.20...

✓ New **Pending Task Approvals** and **Pending Team Task Approvals** will serve to optimize the way Tasks are assigned and approved upon completion, among team members and leaders within an Organization.
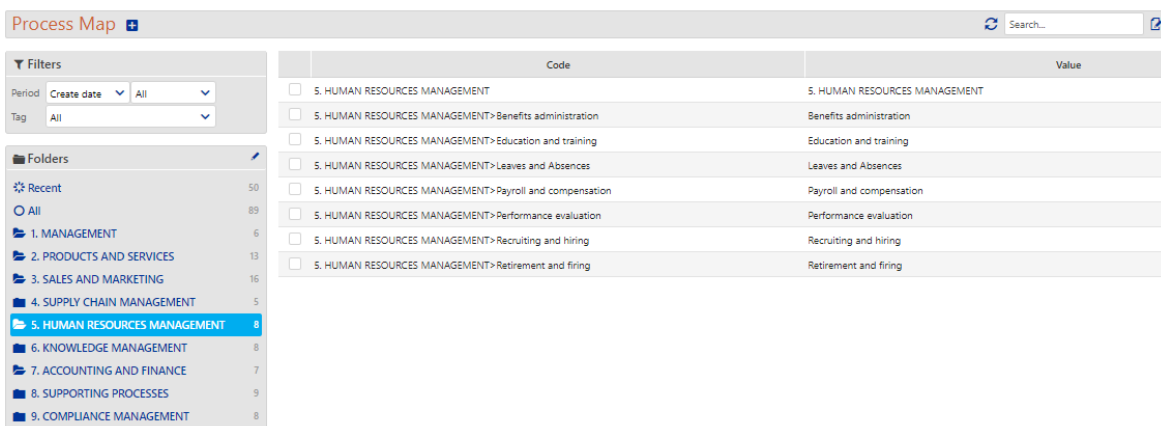

2. Business Processes

We acknowledge that Comidor **Processes** are placed right at the heart of an organization, as such we are dedicated to strengthening the **BPM** functionality offering, bringing the latest technology in Workflows automaton, as well as keeping fit for use and purpose.

You shall notice the Main menu item changes:

✓ Process Dashboard has been renamed to **Processes Overview**

✓ Generic Processes has been renamed to **Processes**

✓ Users have a **Process Map** tool available to draw their Core Processes and its subcategories
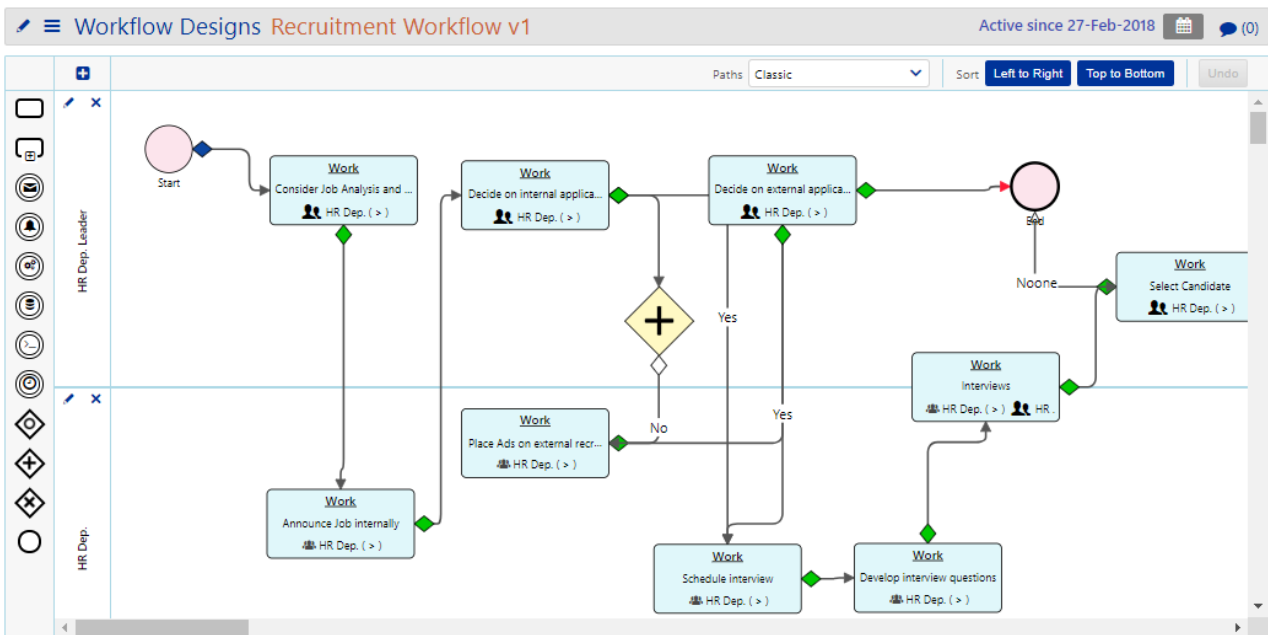

3. Workflows

We have enriched **Workflows** functionality at our built-in BPMN2.0 modeller with powerful features, such as:

- ✓ Assign stages to specific roles
- ✓ Send automated E-mails
- ✓ Send autonomous system notifications
- ✓ Insert delay using timers
- ✓ Copying and versioning of workflows
- ✓ Create automated processes based on workflows triggering

We pay attention to our end-users, requiring easy communication with existing 3rd party systems and databases, by

- ✓ RESTful Web Services
- ✓ Custom Field Type Queries
- ✓ Custom Field Type JSON

4. Projects

Our platform includes a powerful Project Management module, seamlessly connected with our core Collaboration and People Management apps, creating a dynamic toolset to plan and execute works. Serving some of the greatest Enterprises worldwide has been the driving force to develop additional functionality, such as:

- ✓ Progress Management
- ✓ Personnel Bookings
- ✓ Approvals
- ✓ Performance metrics (estimated vs actual)
- ✓ Use of Region codes & Business Functions.
- ✓ Quick Import/ Export
- ✓ Enriched Analytics
- ✓ Reports & Dashboards

This mechanism serves to easily allocate the resources needed on the Project basis, taking advantage of workflows during **Booking** processes and advanced task management for the **Approvals** of completed tasks within **Working Packages**
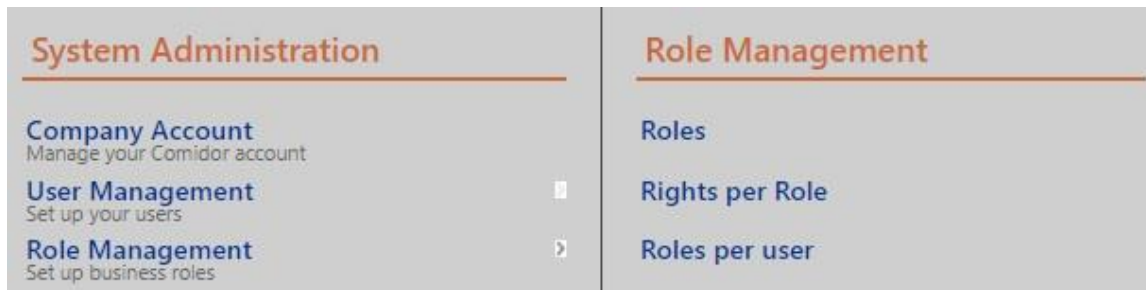

5. System Administration

The latest version includes improvements related not only with Comidor core functionality, but with System Administration as well. It is now available for Administrators to set up Roles and Applications Rights easily, using:

- ✓ Roles
- ✓ Rights per Role
- ✓ Roles per User

✓ Enjoy Comidor v5.6
