comidor

Product Differentiation

License pricing flexibility

Integrated, all-in-one platform

No-code and Citizen development

Customization and scalability

Execution & delivery of automation projects without extensive training

License Pricing Flexibility

A **cost-effective, affordable** solution for businesses of all sizes

Single Plan with 4 modules-
Studio, Workplace, Packages, and Administration

Regular User

$9

per user per month

Standard or Regular user license enables one named user to have unlimited access to Workplace and Packages modules.

Power User

$40

per user per month

Power user license enables one named user to have unlimited access to every Comidor module including Studio and Administration.

Concurrent User

$25

per user per month

A Concurrent user license may serve several named or anonymous users one at a time, on a first come first served basis, who may access Workplace or Packages modules.

✓ pricing structure that can be tailored to the specific needs of each client

✓ discounted pricing for customers with large user volumes

✓ greater scalability, as businesses can easily adjust their level of investment as their needs change over time

comidor

No-code and Citizen Development

Robust no-code/low-code platform and citizen development approach, empowering users with little to no coding experience to build and deploy custom business automation solutions quickly and easily

- Visual design interface for creating workflows, building applications, and designing forms

- Drag-and-drop functionality, pre-built templates and ready-to-use components for easy development

- No coding experience required

comidor

Customization and Scalability

Highly customizable and scalable solutions that allow businesses to tailor their automation projects to their unique needs and easily expand as their business grows

Customization

- Highly customizable features, such as custom data fields and forms, automated business rules to customize workflows, custom dashboards and reports

- Platform customization to tailor the software to meet their specific needs and improve the user experience

- Customizable user interfaces for tailored branding and user experience

Scalability

- Modular architecture for flexible scaling and ability to add new features and functionalities as the business grows

- Elastic infrastructure for scaling up based on demand
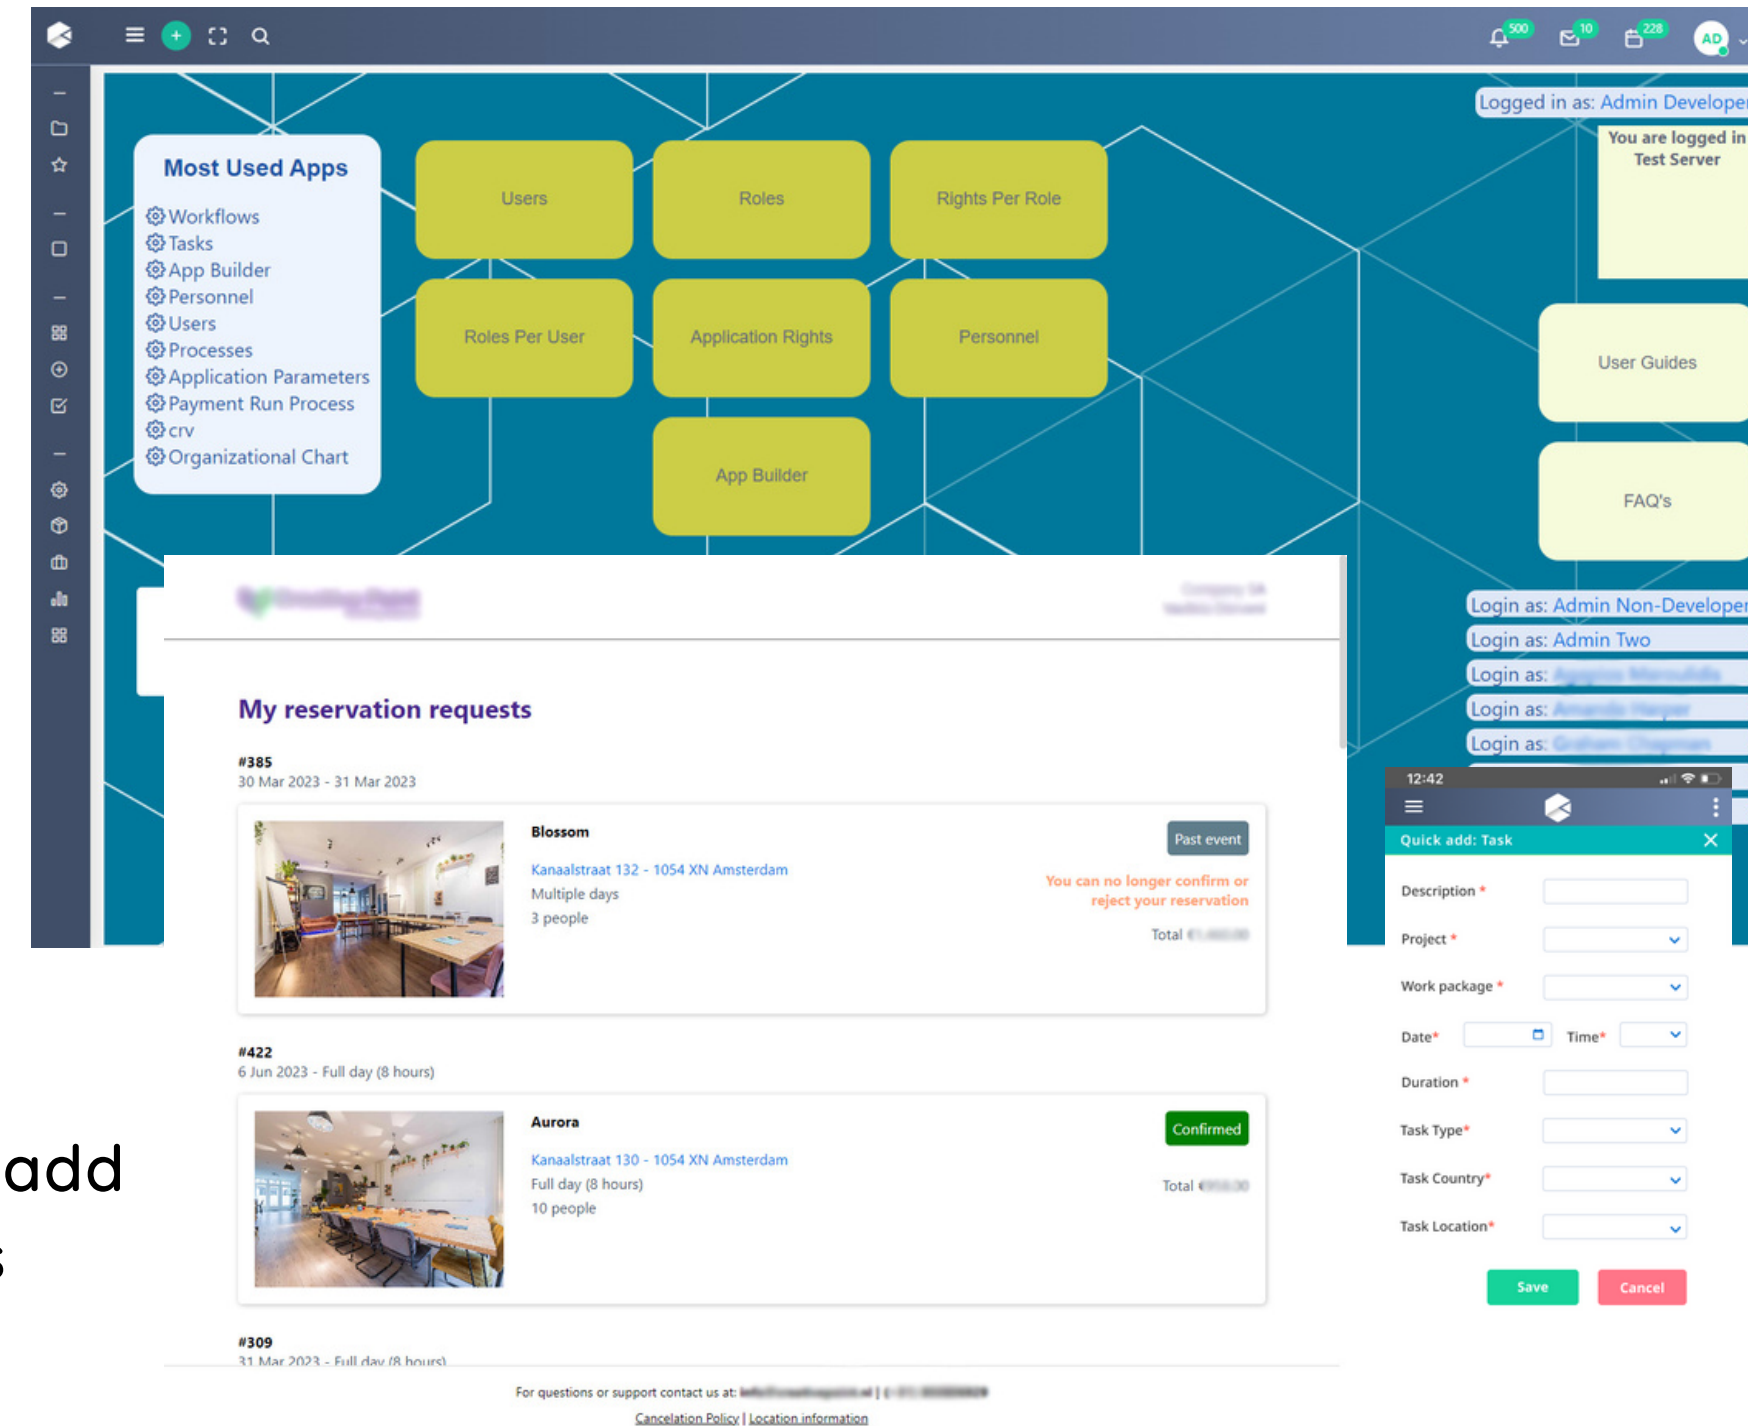

Execution & Delivery of Automation Projects without Extensive Training

✓ Intuitive, user-friendly interface for easy adoption and execution of process automation and application development

✓ No-code/low-code platform for quick and easy development of automation solutions without extensive coding knowledge

✓ Pre-built components to accelerate development and reduce time to delivery

✓ Dedicated support team to provide assistance and guidance

Time to build and deliver new or better functionalities
